Clear coat

System Kar-Bon

perfectly matched

Kar-Bon is a new, innovative system which facilitates your work.

Numerous years of experience and global knowledge have helped in the development of a technologically advanced system for even the most demanding customers.

It is a basecoat system which utilizes high-quality European technology, with superb color matching and coverage, at an exceptional price.

Formulas are obtained using our user-friendly Color Matching Software.

The simple mixing ratio of two part **Kar-Bon** basecoat with one part basecoat thinner offers improved spraying quality over most conventional basecoats

ColorTool

the full set

ColorTool is an integral part of the color mixing system. Painted chips are arranged chromatically (by color) in an aesthetic cabinet.

This arrangement allows intuitive location and selection of any required color.

ColorTool is regularly updated, which guarantees availability of colors for even the latest car models.

The documentation of colors is a common feature of **PROFIX** branded systems. You can therefore expand your range of mixing machines without incurring additional costs. **ColorTool** is an integral part of the color mixing system. Painted chips are arranged chromatically (by color) in an aesthetic cabinet.

Over 5000 painted chips

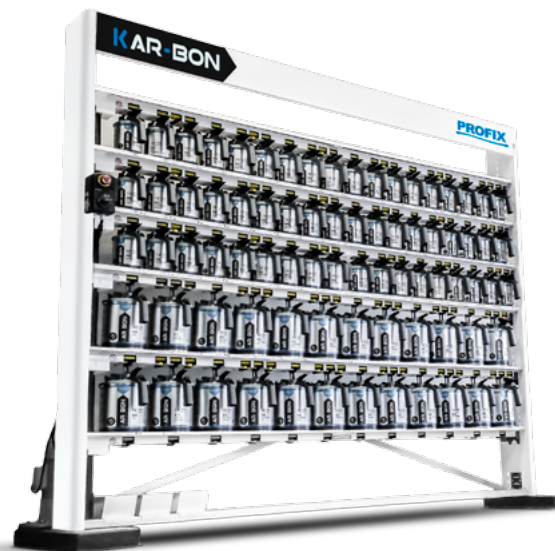

Mixing machine

the full set

Our modern, energy-efficient mixing device can be used with all toners. It prevents the paint from drying out and the settling of solid pigments in the bottom.

The mixing machine works extremely quietly: stirring lids included with the appliance are ergonomic and seal the pigments from drying out.

It works in temperatures from -20°C to 50°C

Turn on at least once a day for 15 min

Software

the full set

The program is intuitive to service and helps shorten daily working time. Formulas can be searched by brand, color number, or **ColorTool** template number.

A combination of the program with the **PROFIX** scales allows one to automatically convert the formulas at the moment of pouring one of the ingredients.

The ability to assign prices to colorants (in four groups) simplifies calculation of the of the finished color value.

Utilization of the color index for plastic elements shortens the formula search time.

An online version of the program is also available for mobile devices (tablets, smartphones).

Programme is also available online

Color wheel

good to have on hand

Info Board makes work with **Kar-Bon** system convenient and simple.

A quick look is enough to know more info about each mix color.

It'll helpfull to prepare a mixture ready to spray. For future references, it is worth keeping the board within a sight range.

Similar description colors in the form of magnetic stickers is in the set with mixing machine

10 years

coat guarantee

If you use **PROFIX** materials and technologies during repair, you get a 10-year guarantee for the varnish coat.

We provide the guarantee because we are fully convinced that the products we offer meet the highest quality standards. During manufacture we use only carefully-selected raw materials and materials.

Use only original brand products PROFIX

The scale

precision

The benefits of the scales:

- interacts with the software
- allows simple formula preparation
- automatically corrects amounts when ingredients are over-poured
- allows small amounts of paint to be mixed
- optional label printer: software allows preparation of the label with the product name, distributor and mixture description.

The printer is optional.

Mobile Training

Center

Learning the capabilities of the innovative colour matching system is interesting for many car varnishers and colorists. Unfortunately, they do not always have time to see or receive training in using such a system.

To meet the expectations of our Clients, the Multiche company opened the Mobile Training Center.

Thanks to this, varnishing training can be held in any location at a time suitable for the participants.

Now YOU decide where.

PROFIX

Quality Policy

at each stage of production

High product quality is of the greatest value to us and our Business Partners.

That is why, as early as 2004, Multichem implemented a Quality Management System meeting the requirements of the international **ISO9001:2000** standard. This has been continued in subsequent years on the basis of **ISO9001:2008** and confirmed by annual audits until the present time.

We know, however, that in order to ensure the high quality and safety of products, even the best procedures and standards may not be enough. A systemic approach is needed and that is why the employees of the Quality Department, equipped with the highest quality laboratory appliances, inspect products at each stage of production.

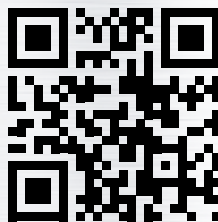

Thanks to this scrupulousness, are fully at ease in offering a warranty for **PROFIX** products.
